## TYPHOON ACQUIRES URANIUM PROPERTY ON QUEBEC'S NORTH SHORE

Laval, Canada, February 28 2007– Typhoon Exploration Inc. (the «Company» TSX-V: TOO) announces the acquisition of a uranium-rich property (North Shore Property) along Quebec's Lower North Shore (refer to the figure below).

This new property is located approximately 32 kilometers east of the community of Havre-Saint-Pierre, and is transected by a regional highway giving year round access. **The property already hosts a uranium showing which historically gave 0.023% U<sub>3</sub>O<sub>8</sub> over 9 meters** (MRNQ files).

The property totals 12.1 km<sup>2</sup>. **The North Shore Property was staked in order to cover a favourable geological environment consisting of a number of uranium bearing pegmatites dykes that could contain significant mineralization**

The Company will acquire a 100% interest by paying C\$ 30,000 and by issuing 500,000 shares to the Vendor.

Following positive results released by Uracon Resources Inc. ([www.uraconresources.com](http://www.uraconresources.com)), **the Company plans to initiate exploration work that could lead to the discovery of significant uranium mineralization.**

In order to increase shareholder's equity Typhoon takes an interest in Uranium but remains focus on its Fayolle project with the team in place since 2003. A new team will be formed to do exploration work on the uranium-rich North-Shore property.
